* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

Explanation

Words and figures inclosed in brackets [] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents, are indicated by a star (*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and 1c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency if sent will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued. Holders of coupons are requested to return the same for redemption.

NOTES OF GENERAL INTEREST

The annual list of Radio stations of the United States for July, 1914, is in press. It contains, in addition to the data concerning Government, commercial, and special stations, a list of the amateur radio (wireless) stations of the United States. Corrections for the amateur list will not be given in the quarterly statements by which the annual list will be supplemented during the present fiscal year. As information concerning the amateur stations is of no particular value to the Navigation Bureau, printing it once a year, as a matter of general information and convenience, is thought to be sufficient.

The tangible rewards of teaching, a detailed statement of salaries paid to the several classes of teachers and school officers, is the title of Bulletin 16, series of 1914, Education Bureau. This will deeply interest a large class of public servants who are generally understood to be not very well paid. The fact that much information was supplied in confidence, not to be published, diminishes the value of the bulletin somewhat, but still that which was openly supplied and is now published is extensive and will enable comparisons to be made by which in the end many teachers may be benefited. Sold at 50 cents by the Superintendent of Documents.

The Joint Commission to Investigate the Purchase of American-Grown Tobacco by Foreign Governments, which was appointed late in 1912, with Senator Martin of Virginia as chairman, has published a small pamphlet report of hearings before the Commission. Copies can be secured only from the Commission.

Department Bulletin 118, a contribution from the Entomology Bureau, Agriculture Department, announces the important demonstration that common commercial borax is the most effective, economical, and practical of the numerous larvicides that have been tested as destroyers of the maggot of the house fly before its development into the mature fly. It does not lessen the value of the fertilizer in which the maggots have their habitation. As borax is cheap and plenty, this demonstration is of unusual value. The Bulletin describes methods of use, etc. 10 cents.

The Commission on National Aid to Vocational Education, of which Senator Hoke Smith is chairman, has made a report in 2 volumes, vol. 1 being the Report proper and vol. 2 a transcript of the hearings held. The Commission was appointed by authority of Senate joint resolution 5 (Public resolution 16) Jan. 20, 1914, which required that the Commission have nine members and that it report its findings and recommendations not later than June 1, 1914. The appropriation made was \$15,000. The President appointed the Commission by personal letter to each member, all bearing date Feb. 17, 1914. The members are: Senator Hoke Smith of Georgia, Senator Page of Vermont, Representative Hughes of Georgia, Representative Fess of Ohio, Mr. John A. Lapp, director of the Indiana Bureau of Legislative Information; Miss Florence M. Marshall, Director Manhattan Trade School, New York; Miss Agnes Nestor, President International Glove Workers' Union, Chicago; Mr. Charles A. Prosser, Secretary National Society for the Promotion of Industrial Education, New York; and Mr. Charles H. Winslow, special agent, Bureau of Labor Statistics, Washington. Notwithstanding the limited time allowed, the Report is apparently a thorough-

going document, giving much information and making recommendations that must command attention. A staff of 45 assistants was employed. The set of 2 vols., 30 cents. The supply is limited.

The Biological Survey Bureau, Agriculture Department, has issued two Service and regulatory announcements, the 1st, dated July 21, promulgating Regulations for the protection of deer, moose, caribou, sheep, and mountain goats in Alaska; the 2d, July 23, proposing amendments of the regulations of Oct. 1, 1913, for the protection of migratory birds. As required by law, these amendments must be made public three months before they are to be put in force. During these three months the Agriculture Department will receive and consider petitions and briefs from persons interested and hold hearings. As finally approved, the new regulations will take effect on or after Oct. 1, 1914, when approved by the President.

Farmers' bulletin 611 is the Agricultural outlook for July. It states that the composite condition of all crops of the United States on July 1, 1914, was about 8.7 per cent. better than the outturn of crops last year.

Examination papers for admission to the United States Naval Academy, April, 1907-April, 1914, have been printed in a pamphlet for general information. They show the young candidate what tough questions have been asked; but they do not show him what tougher questions remain to be asked. Copies are supplied by the Superintendent of the Academy.

The first (1913) number in the United States Geological Survey's new annual series, Shorter contributions to general geology, has been issued as Professional paper 85. It is made up of five expert papers, with preface and index. From the Superintendent of Documents, 25 cents.

Fifteen cents to the Superintendent of Documents will bring a new and brilliantly illustrated pamphlet entitled Origin of the scenic features of the Glacier National Park.

The Interstate Commerce Commission has printed a new set of Regulations for the transportation of explosives and other dangerous articles, to become effective Oct. 1 next. 20 cents.

The tenure of the United States Commission on Industrial Relations expires by limitation Aug. 23, 1915, that date being three years from the date of approval of the law creating the Commission. There was delay in making the nine appointments of members of the Commission and of course additional delay in organizing, finding the right material for the staff, and planning the work, so that now little more than a year of life remains to the Commission—unless Congress sees fit to extend its term. It has thus far issued but one publication, a pamphlet of 16 pages entitled Tentative proposals for consideration on the question of public and private employment offices. These proposals are published for the purpose of eliciting criticisms and suggestions, which are invited. Presumably the Commission will publish a report, but this can hardly be written until its work has been completed. The Commission has been lately holding hearings in Chicago.

The Bureau of Construction and Repair, Navy Department, has in press a 7th edition of the Flags of maritime nations. All the national flags of the world will be shown in their actual colors. The colored lithographic plates will in fact make up nearly the whole of the book, though there will be some descriptive text. The date of publication has not yet been announced. Copies will be on sale by the Superintendent of Documents at \$2 or less. The last previous issue was dated 1899, though there were some reprints of later date.

Senate document 719, 62d Congress, now in press, is a compilation of laws, agreements, Executive orders, proclamations, etc., relating to the Indian inhabitants of the United States, negotiated and enacted from Dec. 1, 1902, to 1913.

It is virtually a 3d volume of Kappler's 2-volume set of Indian laws and treaties. The Superintendent of Documents will have copies of the new volume for sale and has also still in stock vols. 1 and 2 at \$2 each. The price of vol. 3 will be announced later. It will not be available for sale in less than 30 days and delivery is not guaranteed even that soon.

Chapter 12, vol. 2, Report of commissioner of education for 1913, is entitled Statistics of commercial schools. One interesting feature of this chapter is a list of stenographers in Executive Departments at Washington, D. C., using various systems of shorthand writing. There are 2,444 stenographers and they use 79 different systems of writing. The figures probably understate rather than overstate the actual conditions. It is no wonder the stenographers cannot read each others' notes.

The Census Bureau is reprinting all of the State supplements of the 1910 Census returns which were issued at first with copies of the Abstract. The new reprints are in gray paper and have title-page, contents, and index to the Abstract that were not in the first print. Advantage has also been taken of the opportunity to correct any errors that have been discovered in the statistics. The new print will *not* be sold by the Superintendent of Documents.

Farmers' bulletin 597, The road drag and how it is used, a contribution from the Public Roads Office, expresses the unqualified opinion of that office thus: "The road drag is the simplest and least expensive contrivance yet devised for maintaining roads constructed of earth or earthy materials." The pamphlet is liberally illustrated. Price 5 cents.

An unusually important and interesting illustrated Farmers' bulletin is number 591, The classification and grading of cotton. The price is 5 cents.

The 1913 volume of the Decisions of the commissioner of patents and of the United States Courts in patent and trade-mark and copyright cases is out of press. Price \$1.00 in paper and \$2.00 in cloth. These prices were not fixed by the Superintendent of Documents.

There is a 3d edition of the Catalogue of coins, tokens, and medals of the numismatic collection of the Mint of the United States at Philadelphia, which has proved to be a very popular book. It has 694 pages of text and is profusely illustrated. The Superintendent of Documents has sold hundreds of copies and can still supply them at \$1.00 each.

The Interstate Commerce Commission report on the New York, New Haven, and Hartford Railroad Co. has been printed, with evidence, as Senate document 544, 63d Congress. It is generally considered to be the most caustic report ever made by the Commission. July 15 the Senate ordered 10,000 copies of the report, without the evidence, to be printed "for the use of the Senate document room." This last clause means that they will not be divided among the Senators pro rata, but on the principle of "first come, first served."

July 30 the Interstate Commerce Commission released for general distribution an important little document which had been printed confidentially. The title is National code of rules governing the weighing and reweighing of car-load freight. It is now on the sales list of the Superintendent of Documents. Single copies, 5 cents.

Another important confidential publication released on the same day is Bureau of Animal Industry order 211, Regulations governing the meat inspection of the Department of Agriculture, effective Nov. 1, 1914, except regulation 27, effective Jan. 1, 1915. 10 cents.

In March and April, 1913, volumes 1 and 2 of Review of Forest Service investigations were published. Because of changes in the plans of publication of the Agriculture Department, it is not likely that any other numbers of the Review will be published. It was planned as a professional rather than a popular

publication. It was intended that it should deal with matters on which the Forest Service cannot yet speak authoritatively. A certain freedom was given for the expression of individual opinion. The views presented are for professional consideration on their merits and full responsibility for them is not assumed by the Forest Service. The volumes issued are liberally illustrated. Copies are on sale by the Superintendent of Documents at 15 cents each.

The Forest Service of the United States, which is a bureau of the Agriculture Department at Washington, also maintains the following-named auxiliary establishments: Forest products laboratory, Madison, Wis.; Ground wood laboratory, Wausau, Wis.; Wood testing laboratory, Seattle, Wash.; Experiment station on the Kaniksu national forest, Priest River, Idaho; Experiment station, Cloquet, Minn.; Experiment station on the Pike national forest, Manitou, Colo.; Experiment station on the Rio Grande national forest, Wagon Wheel Gap, Colo.; Experiment station on the Coconino national forest, Flagstaff, Ariz.; Experiment station on the Manti national forest, Ephraim, Utah; Experiment station on the Plumas national forest, Quincy, Cal.; Seed-testing laboratory and willow-holt station, Arlington farm, Washington, D. C.; Dendrological laboratory, Washington, D. C.

The 1st Report of the Public Utilities Commission of the District of Columbia has been released from confidence and is now on sale by the Superintendent of Documents at 25 cents. Judging from inquiries received, this report has excited more than a merely local interest.

A new edition of the Signal book, U. S. Army, is in press. It will not carry the designation "Circular 7" as former editions have done.

Decisions of the Comptroller of the Treasury will hereafter be published in monthly, quarterly, and annual editions. Monthly issues will appear for July, August, October, November, January, February, April, and May. Quarterly editions will appear in September, December, and March. The annual edition will bear date in July. There will be 8 monthlies, 3 quarterlies; and one annual for each year.

National and State indebtedness and [productive] funds and investments, 1870 to 1913, is the title of an important compilation lately published by the Census Bureau. The word "productive" does not appear on the title-page but is found in the letter of transmittal, and evidently belongs. Sold by the Documents Office at 40 cents.

CANDLERS AND BUSHELMEN

The "Egg candling chart" is one of the latest enterprises of the Chemistry Bureau, Agriculture Department. It consists of 16 portraits in the natural colors of hens' eggs of various grades, from the delectable egg of absolute freshness to the addled egg of odoriferous conditions. Each egg depicted is shown as it looks in the shell "before the candle" and also as it looks when taken from the shell. For use in illustrating Department Bulletin 51, "A bacteriological and chemical study of commercial eggs in the producing districts of the central West," the chart has been cut up into 8 full-page plates, each containing 2 colored portraits of one egg, showing it in the shell and out. The bulletin has 77 pages of text, describing the various misadventures which may befall an egg in the course of its travels, telling how to detect the presence of these maladies, and whether eggs presenting any of the various appearances shown in the chart should be marketed as "fresh," should be sent to the "breakers," or should be discarded as impossible. The "breakers" are concerns which take eggs out of their shells and freeze or dry them for use by bakers or others who use large numbers of eggs in manufactures.

Candlers are persons who examine eggs when held up before a light. Formerly this light was a candle and the places of use were the dark cellars under country stores. Thus the terms "candling" and "candler" originated. Bulletin 51 recommends an electric bulb as the proper light to be used by "candlers" in "candling" nowadays, but still adheres to the old terms. "Candling" has grown into a calling in which many persons are employed and in which much expertness has been developed. The plates show just what the "candlers" see in their work and what these sights mean to them. The name is a somewhat curious survival of a trade term after the conditions under which it originated have been much changed. Perhaps an even more curious instance of a similar survival is the term "bushelman" in the tailoring trade. Years and years ago the tailors who were employed to make the slight changes and repairs immediately required in men's clothes for which customers were waiting found that the handiest thing to curl up on was the bottom of a half-bushel measure. It was smooth and the right size and it came into general use. Hence the name "bushelman," which survives though the half-bushels have mostly disappeared.

What have bushelmen to do with eggs? Nothing at all. So we return to Bulletin 51. It is the first of a series of reports resulting from the investigation of frozen and dried eggs now making by the Food Research Laboratory of the Chemistry Bureau, Agriculture Department. The Laboratory, which is located in Philadelphia, is under the direction of Dr. Mary Engel Pennington, a chemist and bacteriologist of extended experience and one of the best-paid women in the Government service.

The egg of the domestic fowl has been from time immemorial and still is one of the most important foods of mankind in all parts of the world. Whether reading Bulletin 51 will increase or diminish the appetite for this food must depend entirely on the reader. The bulletin is sold by the Superintendent of Documents at 40 cents. The price of the chart alone is 30 cents.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the publication number, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and

Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.
